PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate with hands-on experience in web development, technical support, and client coordination. Skilled in Laravel, React.js, Tailwind CSS, MySQL, technical documentation, software testing, and troubleshooting. Experienced in supporting client needs, understanding technical requirements, coordinating with teams, and resolving issues while working as an Account Executive for IBM Software. Strong communication, problem-solving, and analytical skills, with a willingness to learn and adapt to new technologies. Seeking an IT or Technical Support role where I can apply my technical knowledge and customer-focused approach to support users and business operations.

EXPERIENCE

Account Executive – IBM Software **September 2025 – February 2026**
Technopaq Inc., Manggahan Pasig

- Managed client accounts by coordinating with technical and product teams to deliver software solutions aligned with business requirements and project timelines.
- Communicated system features, updates, and technical information to clients through meetings and email, ensuring clear understanding of solutions and services.
- Maintained accurate client records, reports, and documentation using internal tools and spreadsheets to support business operations and performance tracking.
- Assisted in resolving client concerns by identifying issues, escalating technical requests, and following up until resolution, contributing to improved customer satisfaction.
- Supported project and delivery processes by tracking client requests, monitoring progress, and ensuring tasks were completed according to agreed schedules.

Web Developer Internship **March 2025 – May 2025**
Qtech IT Business Solution, Tayabas Quezon

- Developed and maintained web-based modules using Laravel (PHP), React.js, and Tailwind CSS to support internal business systems and improve user experience and functionality.
- Designed and implemented database structures using MySQL to store and manage system data efficiently and ensure data accuracy and reliability.
- Collaborated with team members in analyzing system requirements, creating UI designs in Figma, and converting designs into functional web pages.
- Tested, debugged, and enhanced system features based on user feedback, contributing to smoother system performance and reduced technical issues.
